

AMERICAN SOCIETY OF PLUMBING ENGINEERS LOS ANGELES CHAPTER

February 01, 2012 Meeting

“Medical Gas 101”

By

Mr. Matt Blanchart

Director, Medical gas Division
Yardley Pump & Vacuum, Inc.

THE SPEAKER.....

Matt Blanchart is the Director of the Medical Gas Division at Yardley Pump & Vacuum, Inc. Yardley Pump & Vacuum has been involved in the Medical gas industry for over 20 years and Matt has been promoting the sales and understanding of Medical gas equipment for 15 years. Matt’s experience with rotating equipment gives him a solid understanding of the source equipment that every hospital needs and trusts. Matt also offers experience on the distribution equipment required for the delivery of the Medical Gases and the codes that relate to the entire industry. Matt graduated from Cal Poly Pomona with a B.S. in Mechanical Engineering.

THE TOPIC.....

Medical Gas 101 discussion will cover all the basic design information regarding Medical Gas for the healthcare industry and the NFPA code. It will start with the different options for the Medical Air and Vacuum source equipment and the related code requirements for each system. Discussion on alarms, zone valve boxes, and outlets will follow and help explain some of the most troublesome areas of the Medical Gas design. Lay-out, basic system design, and common design mistakes will also be covered.
