

AMERICAN SOCIETY OF PLUMBING ENGINEERS LOS ANGELES CHAPTER

September 11, 2019 Meeting

“WHO SAID OVERSIZING IS ALWAYS GOOD?”

By

**Mr. Zay Soe, PE, CPD, GPD, LEED AP
Associate, Arup Los Angeles**

WHAT YOU WILL LEARN:

Topic will resolve on the discussion about Pros and Cons of oversized pipes in the gravity waste system and hot water distribution system. The art of the design approach to optimize the performance of the plumbing system is the balance among various parameters, such as water saving, evolving technologies, client expectation and traditional practices.

THE SPEAKER:

Zay is an Associate at Arup Los Angeles office. He spent the last 9 years with a design-build contracting firm, designing and managing projects from early planning through the end of construction in multiple market sectors including healthcare, entertainment, hospitality, and education. Currently, Zay is leading the plumbing group for the Government Market Group of the Arup, Los Angeles office.

He is passionate about the collaborative design approach where risks and opportunities are openly discussed among team members to promote innovative solutions for the overall team benefit. His strengths include innovative problem solving, team building, and mentoring colleagues.

Zay believes that “there is always something to learn every day.”

If you have additional questions or needed information on his presentation, you can reach him at: Zay.Soe@arup.com.
